

Would you like Broadband Internet with that Sir?

These days, with connected devices becoming more common, and WiFi shipping as standard on such a variety of devices including PDAs, laptop computers, and now Mobile Smart-Phones, WiFi hotspots are increasing in relevance to business and entertainment, and the ideal extension to your existing business.

With Xilo Online's flexible and secure iCharge service behind it, the DuxTel Internet Commander is ready for business right out of the box!

HotSpot-In-A-Box Just add internet

The DuxTel Internet Commander Solution

A turnkey Wireless ISP solution complete with integrated online credit card payments.

Turns your Broadband Internet Service from a cost centre into an immediate revenue stream!

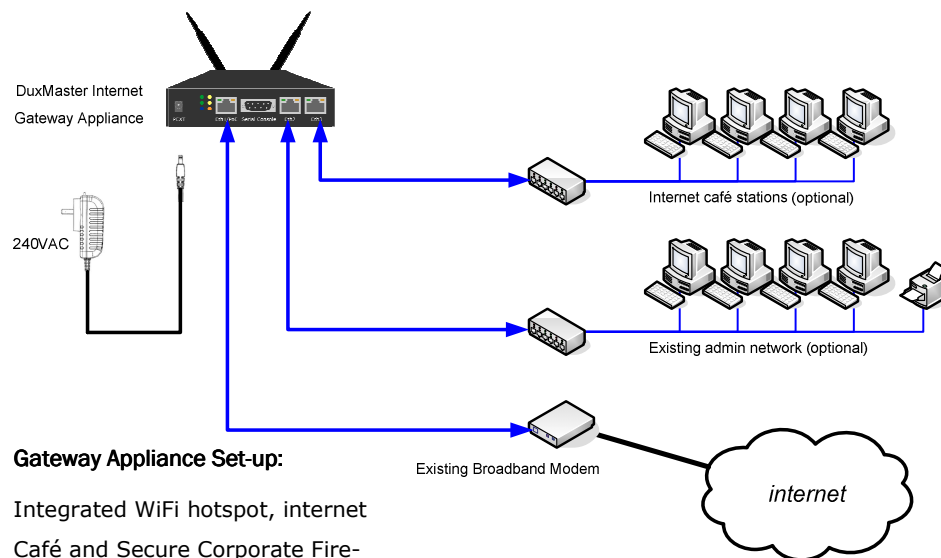

Secure online payments by Xilo Online

Wireless Broadband ISP in-a-box

Out of the box, the DuxTel Internet Gateway is a state of the art Wireless Broadband Internet solution.

Simply plugging in and turning on the Duxmaster appliance is ready to deliver your customers controlled access to your own internet service. The included DuxAdmin online hotspot administration application gives you the freedom to design your own internet access plans including permanent ISP-like monthly download limits, shaped or charged on excess, as well as fixed price pay-in-advance ticket plans.

Gateway Appliance Set-up:

Integrated WiFi hotspot, internet Café and Secure Corporate Fire-wall in one sophisticated package

Just Add Broadband Internet

The DuxTel Internet Commander solution provides everything needed to deliver fast and reliable internet services to your customers. All you need is a broadband internet service from an ISP. The DuxTel service works with all Australian and international service providers, including ADSL, wireless and even 3G services.

Ideally suited to accommodation and hospitality industry providers, the DuxTel solution is also a perfect

choice for tourism operations, sports and entertainment venues, education centres, and shopping malls. In fact anywhere that there is a market for high speed wireless internet services is a location ready for the DuxTel solution!

Payment Choices

Although there are alternative hotspot solutions on the market, no other offers online credit card payment as an out-of-the-box feature.

You don't even need your own merchant facility to allow your customers to buy internet access from your own DuxMaster hotspot.

Using the innovative iCharge payment solution by Xilo Online, DuxTel will receive the funds on your behalf, and then automatically credit your DuxAdmin account with the payment amounts.

At any time, you can set up your own iCharge service, and then the DuxAdmin solution will deliver payments directly into your nominated bank account.

Of course, you can also sell access over-the-counter for cash or account or packaged with other services as with any other service. Flexible and secure payments to suit all of your customers, 24 hours each day ensures happy customers and a steady revenue stream.
